

## Gary Player Quotes on ReZoom™ Multifocal Lens Procedure

### BEFORE AND AFTER

*Several years prior to my ReZoom™ Multifocal Lens procedure was a miserable time in my life. I had seven years where I never saw the ball land on the fairway; I never saw the ball land on the green. When you're playing golf for a living, you must see clearly. Since I've had the ReZoom™ Multifocal Lens procedure, it's like the lights have been switched on. The ReZoom™ Multifocal Lens procedure vastly improved my life.*

### DEALING WITH FEAR

*When I decided to have the operation, I was obviously a bit apprehensive. Those fears were unfounded. I didn't feel anything during the procedure. I had no pain. It was actually a very easy time for me as a patient.*

### CHANGES IN GOLF AND LIFE

*I've noticed a massive difference. I can read the line of the putt so clearly – I am much more decisive in club selection. I even can read the scorecard. Outside of golf, the ReZoom™ Multifocal Lens procedure has also improved my life. Just the fact I can read again to my grandchildren is a major plus.*

### AFTER THE PROCEDURE

*The biggest surprise I had after the ReZoom™ Multifocal Lens procedure was that I didn't have to wear glasses or contacts. I could see far. I could see near and I could see in between. What a difference that has made!*

-MORE-

*After my ReZoom™ Multifocal Lens procedure, I really haven't had any side effects. Right after the surgery I noticed that there was a big halo around the lights of an oncoming car. But that halo lessened each day after the surgery. I'm told that the brain makes the adjustment and every day you see better and better and better.*

*The ReZoom™ Multifocal Lens procedure has changed my entire life. I have 17 grandchildren and now I'm able to sit and read to them.*

*I've also noticed a big change when I'm driving. Sometimes I couldn't read the signs next to the red light. Now I can see them clear as a bell. I can read without contacts, without glasses. I can see far, near and in between.*

#### **PLAYING IN THE MASTERS TOURNAMENT ONE WEEK AFTER THE REZOOM™ PROCEDURE**

*It was quite astounding. I played in the MASTERS this year **only one week** after my ReZoom™ procedure in my left eye. And I got there and I was one of two people to birdie the 1<sup>st</sup> hole. And that was so encouraging because to go into a major tournament like the MASTERS just having had the operation one week before, I didn't think I'd be able to compete. Well, I shot a 79 on a very difficult course and beat many guys a lot younger than me!*

-MORE-

#### **"FAIRWAY BOB"**

*In recent years, my caddy got the nickname "Fairway Bob" because every time I played – I'd hit the drive and ask: "Fairway, Bob?" In other words, I was asking him if the ball was in the fairway because I couldn't see whether it was. Other caddies eventually they started calling my caddy "Fairway Bob." Now I can stand there and say, "Bob, that ball is on the fairway, can you see it?"*

## **READING TO MY GRANDCHILDREN**

*One of things I enjoy doing most since I've had the ReZoom™ Multifocal Lens procedure is reading stories to my grandchildren – we have 17 of them – and to be able to sit down and read them and tell them stories is a great joy.*

## **SEE LIKE I'M 25 AGAIN**

*As you get older you begin to think, "Well, my sight is gone or going." To be able to get this miracle – this miracle – where you can again see like you're 25 years of age. You cannot comprehend it.*
